Video: <https://youtu.be/uilsY9c-JkQ>

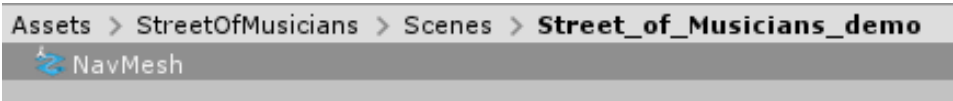

24 background FBX files.

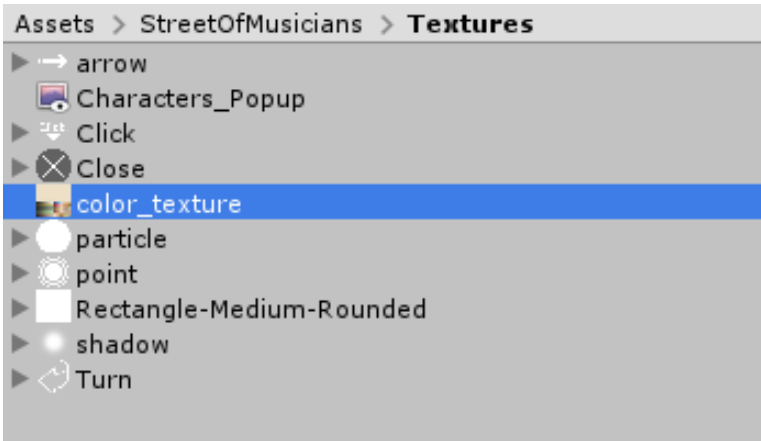

10 characters FBX files.(with animations)

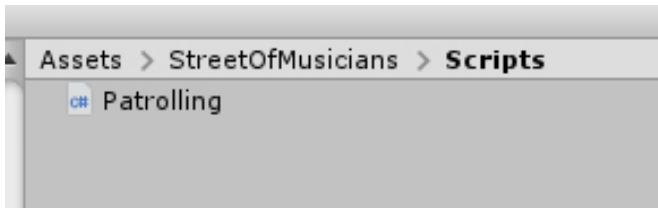

1 NavMesh.

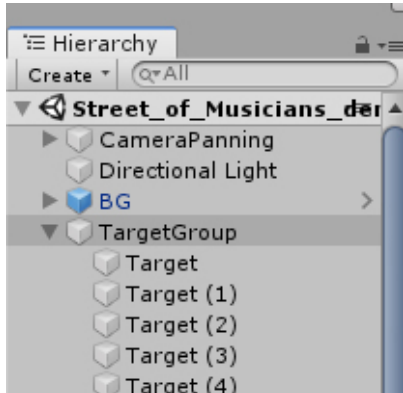

1 psd texture file and 8 png icon files.

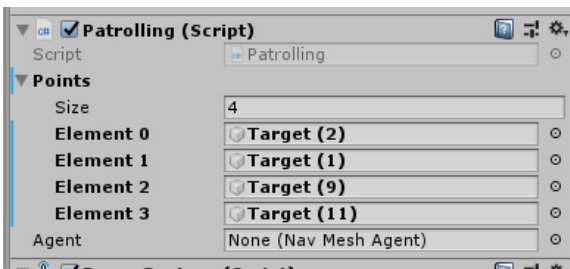

*About <Patrolling> scripts.

Use the navigation system to create a path for your character to patrol.

1) Create a new empty in the hierarchy. Name it target.

2) Drag and drop the patrolling script on the selected character.

3) Add an element field by entering the desired value in the waypoints > size field.

4) Drag and drop the target object into the element field.

P.s

Before running the Street_of_Musicians_demo_2.0 scene, download the TouchScript asset.
